

# BIG F PRO mod. 267

HOUSING  
20"

LAMP  
67W

FLOWRATE 95 lpm  
(30mJ/cm<sup>2</sup>UV)

The BIG F PRO 267 provides up to 95 litres of safe drinking water per minute, ideal for larger houses and villas with more than 2 bathrooms. It's a complete system with a 20 Micron Sediment Filter (1) and a 5 Micron Active Carbon Filter (2) to remove sediment, taste/odour and Chlorine, which are integrated in 20" filter housings as pre-filtration before the UV unit (3). The easy-to-install system uses standard 1" inlet and outlet water connections. The display (4) on the control unit makes it easy to keep track of when the UV lamp needs to be replaced. The system comes complete with a 67W UV lamp and filter cartridges.
