

OPEN TO CLEAN

HYDRA

self-cleaning filter

HYDRA is a single stage **self-cleaning** filter with a 90 micron stainless steel mesh-filter for effective removal of sediments. Easy and quick cleaning, thanks to the exclusive system with back-wash in counter-current. HYDRA can be installed as a pre-filter before your water tank to keep it clean from sediment and sludge or before your existing water filter to save on maintenance costs.

Very easy to operate - simply open the valve to flush accumulated sediment out via the drain funnel.

Dimensions: 390 x 120 x 107 mm

Max Water Pressure: 8 bar
Min Water Pressure: 1.8 bar
Max flow rate: 6000l/hr

Connection Size Inlet: 1" Female BSPP
Connection Size Outlet: 1" Female BSPP
Nominal filtration: 90 micron
