

BIG F PRO mod. 256

HOUSING
20"

LAMP
56W

FLOWRATE 70 lpm
(30mJ/cm²UV)

The BIG F PRO 256 provides up to 70 litres of safe drinking water per minute, suitable for a small to medium size home. It's a complete system with a 20 Micron Sediment Filter (1) and a 5 Micron Active Carbon Filter (2) to remove sediment, taste/odour and Chlorine, which are integrated in 20" filter housings as pre-filtration before the UV unit (3). The easy-to-install system uses standard 1" inlet and outlet water connections. The display (4) on the control unit makes it easy to keep track of when the UV lamp needs to be replaced. The system comes complete with a 56W UV lamp and filter cartridges.
